KICKBACK MUD FLAPS

Installation Instructions

Installation Time: 1hr (approximately)

NOTE: These flaps are for use with the splash guard only. NOT for the use of original factory mud guards.

RECOMMENDED TOOLS: NOT SUPPLIED IN KIT

Drill
Level
#3 Robertson Bit
T15 Torx Bit

HARDWARE LIST: SUPPLIED IN KIT

2x Front Kickbacks
2x Rear Kickbacks
16x Install Screws

INSTALLATION INSTRUCTIONS:

1. Take flaps and hardware from package, then arrange on floor to keep fronts and rears together. Install will require 4-supplied screws per mud flap.
2. Identify front mud flaps by the inner bend on the aluminum. There will be a driver's side and a passenger side. **NOTE:** The bend when installed should be on the inside of the fender well, giving room for the tire to turn.
3. Remove the factory screws in the fender that matches up to the holes in the mud flap and discard. Use supplied screws to attach mud flap. Aligning your flap to be as flush as possible to your outer edge of the tire.
4. When installing the front flap, you must turn your front tires to create room for installation. **NOTE:** Driver side turn left, passenger side turn right.

****DO NOT OVER TIGHTEN INSTALL SCREWS****

5. Install one screw at the top of the flap then adjust to level. Once leveled, screw in the remaining holes in the mud flap and into the fender.
6. Rear flap installation may require removal of rear tires for easy install. Repeat step three and five on the remaining tires.
7. Enjoy your new Eagle Kickback Mud Flaps!

DESCRIPTION:

Defend your ride from the rage of the roads with Eagle Kick Back Mud Flaps. Custom-made from durable aluminum material, these heavy-duty mud flaps provide plenty of protection along with ample of clearance for oversized tires.
